

*A tangible & beautiful way to uplift & strengthen*

# Adopt a Sister

*mothers, daughters, friends, and sisters  
who have undergone mastectomy surgery.*

---

Mastectomy surgery, a possible course of treatment for breast cancer, is the surgical removal of breast tissue or breasts.

Reconstructive breast surgery after mastectomy surgery is an option, but can be physically, emotionally, and financially draining, and out of reach for some survivors.

**Adopt a Sister is an initiative developed to address this need**, by providing breast prostheses to women who have undergone mastectomy surgery.

---

**A complete set of breast prostheses** comprises a bra with a bra cup, and the breast form (prosthetic breast).

With your donation of \$200, we can provide a complete set of breast prostheses to one recipient.

So, please join us! **Help us uplift and support these very deserving women by adopting a "sister"!**

**Adopt a Sister's mission:** to uplift women who have survived the ordeal that is breast cancer.

**An Initiative brought to you by Commucare**
